

APPENDIX E (CONTINUED)

E7 – WORKSHOP DIRECTIONS

Understanding the Issues

Open House Workshop

Station 1: Community Snapshot

Start here to see the roads and transit we have today.

Station 2: Understanding the Issues

Learn about transportation related issues we are facing - from basic health and safety issues, to economic considerations, and environmental aspects too.

Station 3: Maintaining our Transportation Infrastructure

Our transportation infrastructure is becoming more difficult to maintain and costs continue to rise. Station three will discuss our declining roads and maintenance needs.

Station 4: Our Community Transportation Investment

While we continue to invest in transportation, resources are limited. Station four will show competing needs and where our resources go.

Station 5: Our Quality of Life

Transportation impacts our quality of life - from our safety to our time and money. See current and future impacts to our quality of life.

Station 6 & 7: Activities- What are your Priorities?

See the transportation project types, and choose your top four priorities. Maps of our roadway and transit projects are also provided. Roll up your sleeves and add to or edit based on what projects you would like to see!

Understanding the Issues

Open House Workshop

Station 1: Community Snapshot

Start here to see the roads and transit we have today.

Station 2: Understanding the Issues

Learn about transportation related issues we are facing - from basic health and safety issues, to economic considerations, and environmental aspects too.

Station 3: Maintaining our Transportation Infrastructure

Our transportation infrastructure is becoming more difficult to maintain and costs continue to rise. Station three will discuss our declining roads and maintenance needs.

Station 4: Our Community Transportation Investment

While we continue to invest in transportation, resources are limited. Station four will show competing needs and where our resources go.

Station 5: Our Quality of Life

Transportation impacts our quality of life - from our safety to our time and money. See current and future impacts to our quality of life.

Station 6 & 7: Activities- What are your Priorities?

See the transportation project types, and choose your top four priorities. Maps of our roadway and transit projects are also provided. Roll up your sleeves and add to or edit based on what projects you would like to see!

Station 1: Understanding Issues Recap

Start here to see a recap from the “Understanding the Issues” workshop series. Whether you attended the Understanding Issues series, or are joining us for the first time, station one will provide information on the transportation related issues we are facing. Topics include the challenges we face in maintaining our transportation infrastructure, our community transportation investment, and our quality of life.

Station 2: What We are Hearing

During the Understanding Issues workshop series, citizens were asked to prioritize project types for their community. At Station 2, we are providing the data from citizen prioritization activities. Prioritization responses are provided from individual community meetings, as well as county-wide and geographic area totals. Review the similarities and differences between community responses.

Station 3: Prioritization Activity

The original list of project types has been refined into overarching project categories. Following up on the initial prioritization activity, take a step further into prioritization and label your **top three priority project categories**. With the numbered dots provided, please label in priority order, what you believe are the most important project categories. **Please only place one dot per category to show your ranking.**

Be sure to stop by the map table where we have provided projects mapped by citizens during our previous workshop series for review and discussion.

Station 1: Understanding Issues Recap

Start here to see a recap from the “Understanding the Issues” workshop series. Whether you attended the Understanding Issues series, or are joining us for the first time, station one will provide information on the transportation related issues we are facing. Topics include the challenges we face in maintaining our transportation infrastructure, our community transportation investment, and our quality of life.

Station 2: What We are Hearing

During the Understanding Issues workshop series, citizens were asked to prioritize project types for their community. At Station 2, we are providing the data from citizen prioritization activities. Prioritization responses are provided from individual community meetings, as well as county-wide and geographic area totals. Review the similarities and differences between community responses.

Station 3: Prioritization Activity

Following up on the initial prioritization activity, take a step further into prioritization and label your **top three priority project categories**. With the numbered dots provided, please label in priority order, what you believe are the most important project categories. **Please only place one dot per category to show your ranking.**

Be sure to stop by the map table where we have provided projects mapped by citizens during our previous workshop series for review and discussion.

Making Choices

Open House Workshop

Station 1: Recap

Begin here to see a recap from our “Understanding the Issues” and “Exploring Options” workshops. Whether you attended previously or are joining us for the first time, Station One will provide information related to issues we are facing and the feedback we have received to date.

Station 2: What we are Hearing

Based on prioritization during our Understanding Issues series, projects were grouped in categories to further refine. During the Exploring Options workshop series, citizens were asked to prioritize and rank their top three project categories for each geographic area. At Station Two, we are providing the data from citizen prioritization activities.

Station 3: How Much Projects Cost

Every project has a cost. Based on the components that go into implementing a project, average costs for projects are provided at Station Three to understand the level of magnitude.

Station 4: How do we Fund our Transportation Needs?

As costs rise, it is increasingly more difficult to maintain and enhance our transportation system. Station four highlights transportation revenue sources, how they work, and what types of projects they can pay for. Fill out your thoughts on funding solutions on your comment card.
